Seminar Cost: 200€.

Registration & Information: please email Dr. Cecchi chirocecchi@yahoo.it

Seminar intention: is to cover all that is included in the book: *"The Art and Science of Chiropractic"* by Roger Herbst (The Chapters) plus everything that Dr. Cecchi has learned from the Masters he had the opportunity to study with.

Statement from Dr. Cecchi: The seminar I intend to give is based on my learning from the Gonstead Seminars as well as from Drs. John Thatcher and Gary Pennebaker, my 21 plus years of experience having taken at least 200 seminars and having seen about 200 patients a week. I had the honor and the pleasure to spend 4 years in Dr. Thatcher's clinic where I first observed and then learned with him moving my hands to acquire the necessary skills to start helping people get better. The following 5 years I was able to discuss my difficult cases with him going over x-rays and taking notes of all his advices. I continued my refinement of the Gonstead method with Dr. Pennebaker (with whom I became a very close and personal friend) following the passing of Dr. Thatcher. With more than 20 years in Gonstead practice I feel I am ready to start giving back.

This series of seminars is open to only 10 doctors because it will be a very hands-on, close and personal experience. The goal is exactly what is listed on the original Gonstead Seminar fliers which can be seen on page 121 of the recently published book *"Gonstead—The Adjustor"* by Matthew Amman: ***These seminars are "designed to help YOU become a better Chiropractor ..."***

I will start from the very foundation of the Gonstead method and progressively cover all that I know and that I have learned, moving at the pace needed for the attendees to really learn the material. Each subsequent seminar will start where the previous one left off. A brief list of what will be covered is:

- Subluxation rational: The Disc
- X-Ray marking and analysis,
- Instrumentation,
- Adjusting on all of the equipment used by Dr. Gonstead.

When the attendees display proficiency in the Gonstead basis we will cover more advanced cases and symptomatology including Sympathetic and Parasympathetic intervention and differentiation.
